

To share my contacts:

You have to go to the contacts tab in outlook. (below mail and calendar in the bottom left)

Then go to "open shared contacts" (it is in blue, in the left column above the tabs)

Then type in "dan shinneman" and you will see my name. Say ok, and it will put my shared contacts right below your contact link. (Other Contacts is the heading it is under)

Click on my name and you will see all of my contacts. You can drag my contacts into your contacts.

I have set up quite a few groups, and I have also included individual email addresses for you all.
